

openSUSE.Asia Summit 2026 Logo Design

Design by A. Thalida

LOGO MEANING

In Javanese philosophy, this shaped is called **gunungan**. It symbolize the universe and the journey of human life. In wayang performances, it serves—among other functions—to open the story, much as openSUSE.Asia Summit 2026 event may mark the beginning of a new "story" and experience for the attendees.

Batik Kawung is one of the most popular batik styles worn in Yogyakarta and is among the oldest batik motifs in Java. Its design consists of circular shapes resembling the "kawung" fruit (sugar palm fruit), arranged neatly in a geometric pattern.

Geeko—obviously— as part of the "gunungan", accompanying the openSUSE.Asia Summit 2026 journey.

Green, openSUSE primary color.
