

OPENSUSE.ASIA ONLINE SUMMIT 2022 LOGO DESIGN

NIKITA TRIPATHI

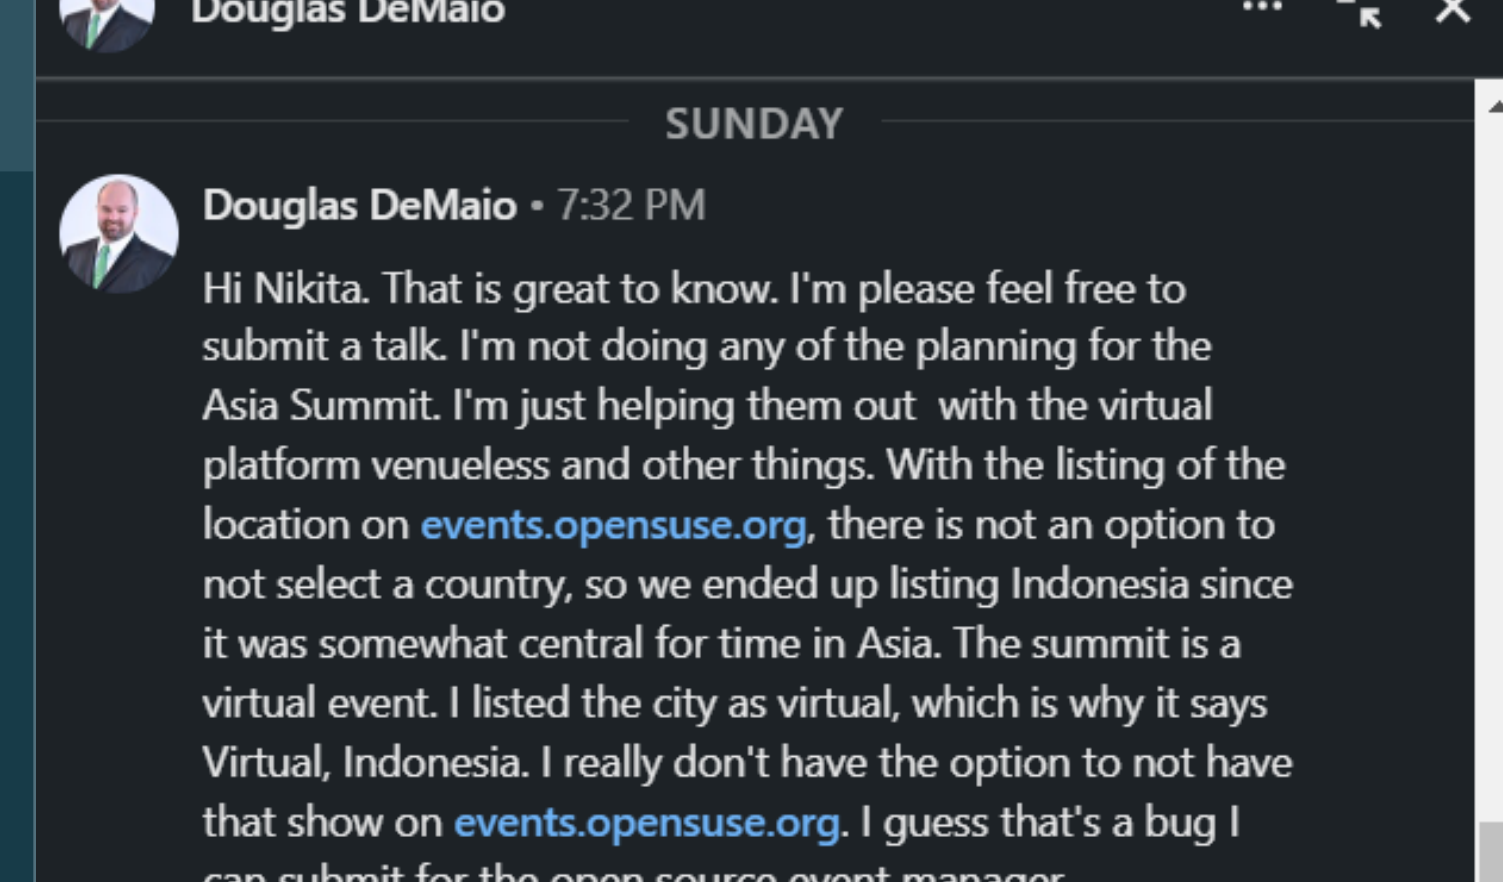

SCROLL

Concept

The venue of Open SUSE Asia summit 2022 is: online/ Indonesia, as per the official website. I noticed that all other venues previously were <City/Country> so I asked Douglas DeMaio about it and I was informed that 'Indonesia' is just added since it lies in the mid time zone of Asia because there was no option to put 'Venueless' in the country option.

Viewing the previous years submissions and cumulating observations, I noticed the most important elements in all the logos were:

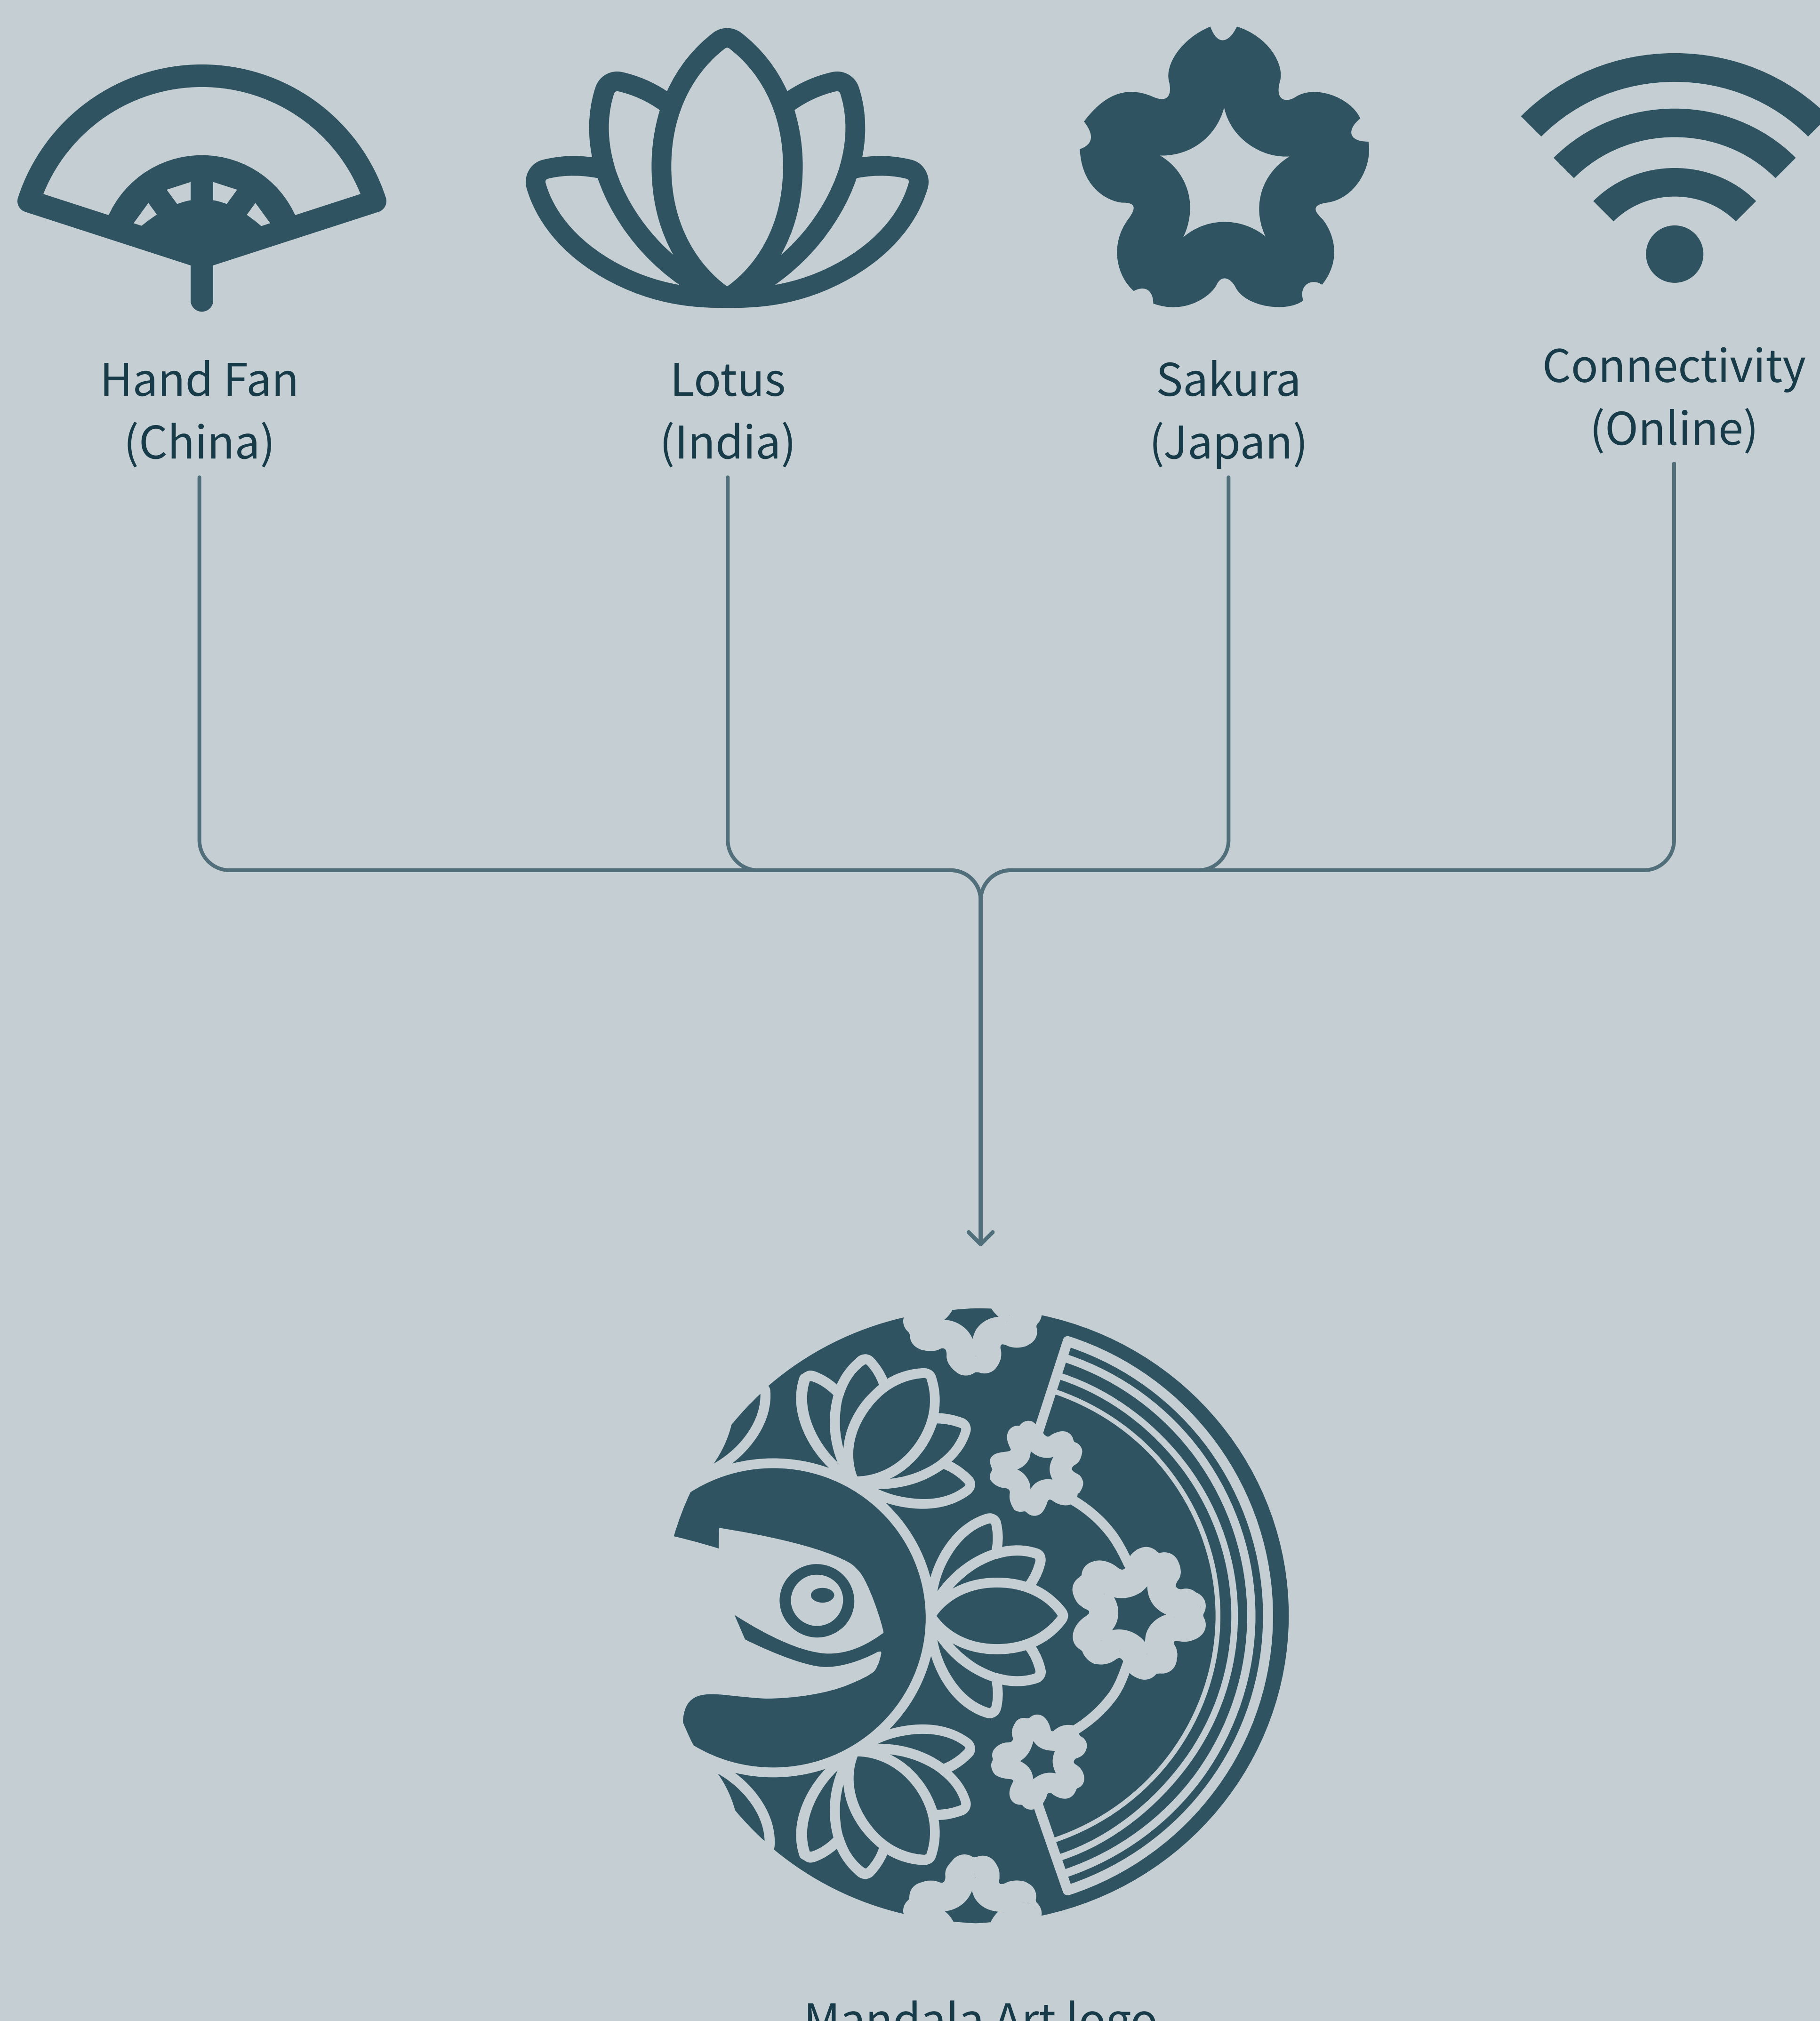

- The logo should clearly voice Asia
- The SUSE logo should however be in focus

Approach

I tried to combine the most popular cultures of Asia: Chinese, Indian and Japanese.

Combining Themes

Final Logo

The final logo is completely monochromatic for ease of usage and application. I used Inkscape to create it.

Philosophy

- I chose Mandala Art, it is a geometric design or pattern that represents the cosmos or deities in various heavenly worlds.
- The art lies within a Circle since in the ancient Sanskrit language of Hinduism, Buddhism and Jainism, mandala means "circle."
- A mandala generally represents the spiritual journey, starting from outside to the inner core, through layers which is why the SUSE logo lies in the inner most layer of the design.
- The inner circle is adorned with Lotus (India) and Sakura (Japan) motifs, while the outer hand fan (China) has a ripple-like pattern towards the outer half to represent Wi-fi: something everyone will use to connect to the virtual summit.
- The final design is kept simple and symmetric with balanced negative spaces to create less noise.

About The Designer

Hello!

I am Nikita Tripathi, the current Outreachy intern at Fedora for the Badges Design Project. I am a sophomore pursuing BTech in Mechanical Engineering at Indian Institute of Technology, Roorkee.
