

ABOUT PHILOSOPHY & IDEA OF MY DESIGN

Why am I participating in this logo competition?

I participate in this competition so that I can also make an important contribution to the openSUSE community with my work. Also, I think it's again a good opportunity for creative people around the world to take the chance to submit their picture and show love to the community. For this reason I designed an image for the upcoming openSUSE.Asia Summit 2022.

Where did the inspiration come from?

I was inspired by the Asian architecture, logo and the brand guidelines of openSUSE. And then I just started with the Inkscape program and created three Asian buildings, a hot air balloon with the openSUSE logo, some clouds, two signs with the text about this event and put the city in darkness to emphasize the contrast. With the hot-air balloon, the guests should enjoy the beautiful city and this basically symbolizes visiting the numerous organized talks, workshops and sessions. That's why, for example, the different colors on the windows.

That's it and I wish all participants a lot of fun with this contest and good luck, no matter who convinces the jury or community with their picture.

Best regards from Dresden, Germany

Steve Zabka
